

APEX – IRAF at the same fixed centres:
flat to the faint end

Real data: NGC 6811, one 30 s *V* exposure, Moravian C3-61000 (bin 2), 2026-06-11, reduced raw → science by APEX.
499 stars, both codes integrate at the same fixed sky coordinates, recentring off in both; IRAF phot (DAOPHOT via PyRAF) runs with APEX-matched parameters (aperture 4.917 px, annulus 24.6-36.9 px, gain 0.681 e⁻/ADU); one zeropoint alignment. Source: benchmark/runs/ngc6811_iraf_allapex_v1.
