

NGC 6811 PSF cost benchmark:same frame, CPU worker=1
Timing jitter from concurrent laptop load; quality counts are deterministic

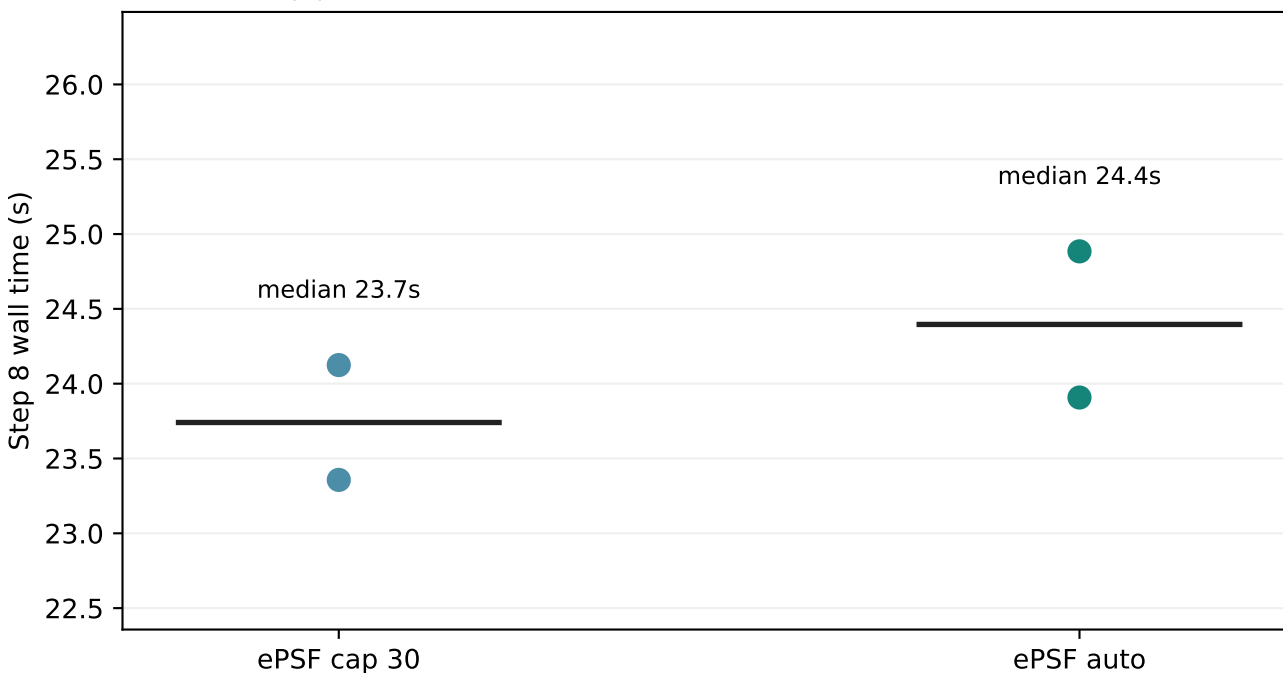

(a) Residual passes

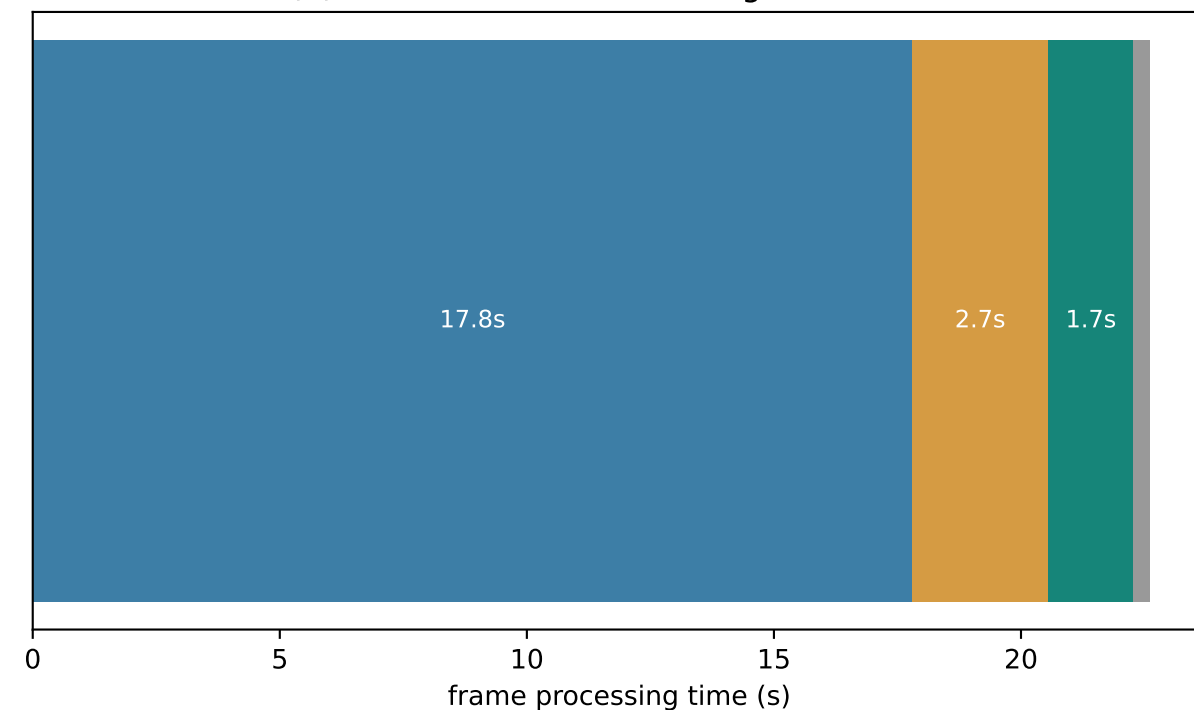

(b) Per-fit iteration cap

(c) ePSF reference count: no material cost difference

(d) Recommended run timing breakdown

PSF fitting: 17.8s ePSF build: 1.7s
background: 2.7s other/save: 0.3s
